

Industrial IOT HMI

FS907R

Product Overview

FS907R HMI is FLEXEMATIC's new generation Industrial IoT HMI with industrial ABS economic frame. The embedded installation buckle adopts an isolated power module and has lightning surge protection, low cost and high reliability. The motherboard is treated with three anti-paint treatments to adapt to harsh environments. Adopting a more practical backward threading method. Good-looking; There are high-resolution models available for selection.

Through selecting IOT module to update to IOT HMI directly to enjoy complete FLEXEMATIC IoT cloud service.
